

Project Brief

Problems in America

- Obesity
- Cancer
- Alzheimer's
- Mental Health
- Social Determinants

Problems in Healthcare

- Cost
- Variation
- Availability or Accessibility
- Stress
- Inaccuracy, inconsistency, transparency
- Health literacy

Needs of Healthcare

- Preventative Health
- Education
- Support
- Personalized communication
- Integrative Models
- Clinical Research and Data Analytics
- Managing Patient Information

Solution

- WELL LIVE

- Subscription based health and wellness platform
- Bridges the gap or becomes a “one-stop-shop” for healthcare needs incorporating nutrition, fitness, mental health, financial health, spiritual health
- Personalized towards your health needs, begins with assessment

- **Key Features**

- Education in a social media format
 - Videos, pictures, podcasts
 - Chat room for social support
 - Benefits
 - Customer: expert insight, shared experiences, learning preference, easier access
 - THR: preventative health promotion, lessen readmissions, promote adherence
- **Referral program**
 - Wellness services
 - Nearest and cheapest
 - Massage, acupuncture, yoga, red light, etc.
 - Benefits
 - Customer: efficiency, convenience, cost effectiveness, insurance integration, community engagement
 - THR: targeted care, reduce readmissions, collaboration and partnerships, cost effectiveness, new customers
- **E commerce**
 - Evidence based safe products
 - Product promotion through affiliate marketing
 - Benefits
 - Customer: convenience, accessibility, trusted recommendations, transparent reviews
 - THR: reduced overhead, brand building, flexibility, scalability

Unique Selling Proposition

- User friendly
- In a format that is familiar but different to the customer, making it a familiar surprise.
- Emphasis on credibility and scientifically researched and qualified, making sure it is safe product for customer
- People have a desire to improve well-being, especially after COVID, need to support emotional and social well-being after social distancing.
- Organized

Growth

- Incorporate health tracking
- AI communication tools
- Research Publication Platform
- Initiate pilot wellness programs
- Make storefront, “medical mall”

Goals

- Enhance patient health
 - Romanticizes truthful and authentic care with education and services, overall supporting comprehensive care
- Community engagement
 - Promotes interaction and builds partnerships with businesses and organizations
- Create resource hub
 - Access to holistic health services, education, and support

Expected Outcomes

- Improved patient satisfaction
- Improved health outcomes and readmissions

- Improved health literacy
- Improved mental well-being
- Increased community engagement
- Increased participation in wellness programs and services
- Increased trust and transparency in healthcare
- Decreased confusion
- Decreased stress

Predictions:

After COVID, virtual businesses exploded.

1. COVID 19 have laid bare the true societal cost of obesity, sedentary lifestyle, and poor nutrition. Prediction is people's desire to improve their physical well-being will be greatly amplified by the pandemic and more companies will provide preventative incentives, benefits, and education campaigns.
2. Sheltering at home and social distancing have amplified the need for services that support emotional and social well-being. Prediction is the demand for mind and body practices like massage therapy and meditation will increase, especially home delivery models.
3. Sheltering and working at home have amplified people's desire to get out of the house. Prediction is as businesses reduce reliance on commercial office space the demand for wellness services in those spaces will go down, harming businesses in those neighborhoods.
4. At the same time, reduced demand for commercial office space will increase vacancies and decrease commercial rent rates, creating new opportunities for residential development and wellness business to emerge.
5. Increased adoption of work from home will increase the value of offline interaction and group activities, fueling demand for wellness services.
6. Emotional safety comes with virtual space.
7. Most rick and motor wellness businesses will become hybrid.
8. Businesses without virtual extensions will find it hard to survive.
9. People will be choosier about who they socialize with.

10. People will be willing to pay higher premium for fewer people involved.

11. Tribalism will increase.

12. Wellness practices for seniors will grow massively in years ahead.
